Siebel Center for Design

HUMAN-CENTERED DESIGN, NACE, & YOUR STUDENTS

A quick guide to Siebel Center for Design's **"Design Thinking for X" (DTX) Courses**, & how they connect to the NACE Competencies (i.e. the skills **employers actually want**).

At SCD, We Teach Human-Centered Design

WHAT IS HUMAN-CENTERED DESIGN?

Human-Centered Design (HCD) is a problem-solving approach that uses design thinking to identify the unmet needs of a population in order to collaboratively and iteratively develop solutions.

It asks: *Who is affected by this problem? What do they actually need? How might we design something that genuinely works for them?*

Why does this matter for your students?

Employers consistently rank problem-solving, communication, and teamwork as top hiring criteria.
HCD builds all three simultaneously through hands-on, project-based work with real constraints.
Students develop portfolio-ready projects and a language for talking about their process in interviews.

THE PROBLEM-SOLVING METHOD USED BY GOOGLE, DELOITTE, & NASA

The National Association of Colleges & Employers (NACE) identifies 8 core competencies when measuring career readiness: Career & Self Development, Communications, Critical Thinking, Technology, Teamwork, Professionalism, Leadership, and Equity & Inclusion

The DTX Course Cheat Sheet

Class Name	Credit Hours	Gen Ed	NACE Competencies
DTX 180 Exercising Empathy	3 hr	Social & Beh. Sci - Beh. Sci	Equity & Inclusion Communications Leadership Teamwork
DTX 221 Human-Centered Design Across Disciplines	3 hr	Social & Beh Sci - Soc Sci, **AND** Cultural Studies - US Minority	Career & Self Development Critical Thinking Professionalism Equity & Inclusion
DTX 251 Introduction to Design Thinking	3 hr		Career & Self Development Critical Thinking Leadership
DTX 495 *Special Topics* Student-Centered App Design	2 hr		Technology Critical Thinking Career & Self Development
DTX 495 *Special Topics* Introduction to Ethics in Human-Centered Design	2 hr		Critical Thinking Professionalism Equity & Inclusion
DTX 495 *Special Topics* Introduction to UX Theory and Tools	3 hr		Technology Critical Thinking Career & Self Development

The DTX Course Cheat Sheet

Class Name	Credit Hours	Gen Ed	NACE Competencies
DTX 495 *Special Topics* Design Thinking & Immersive Experiences	3 hr		Communications Teamwork Leadership
DTX-495 *Special Topics* Design Thinking & Health Innovation	3 hr		Technology Equity & Inclusion Critical Thinking
DTX 499 Innovation Studio	3 hr		Leadership Critical Thinking Equity & Inclusion Professionalism
